## Secret of Success

### CDC -a leading Migration Agent

**C**areer Development Centre (Pvt) Ltd, found and formed 6 years ago, by its dynamic and result oriented Directress, Unee Samanthika Pathirage, has come a long way since its humble beginning. The unique feature of CDC "Carefully Designed Concept, now stands proud and tall.

To boast of it's achievements, a countless number of families and individuals have successfully found their way to greener pastures in countries like New Zealand, Australia, Canada and the United Kingdom. CDC's affiliation with one of the leading recruiting and consultancy organizations in New Zealand and being their only Agent here in Sri Lanka, has given an extra edge, when and where migration and work permits to New Zealand mattered. So much so, that during recent times, its success rate on migration to New Zealand has been on a very steady increase.

One of the unique feature of CDC is their screening procedure, whereby their experi-

enced and skillful staff could efficiently and accurately forecast a candidate's eligibility to a selected field. Another, is the minimum burden laid on the applicant providing overall solution till they find their nestles in the required country. In other words once an applicant has submitted his or her papers, CDC virtually takes overall responsibility to go through the process with a meticulous procedures, to achieve the best and most favourable for their clients.

To quote the efficiency and effectiveness, it is admirable to note that it has been pure expertise on the part of all their

staff members and their team work. They have been able to handle the migration processes, overcoming the usual obstacles, by a skillful and intelligent approach in presenting applications to the relevant authorities, for speedy reviews.

When it comes to Health professionals, there have been various obstacles that have frustrated them with overseas registration procedures. But CDC has discovered a new path in getting over these obstacles and have successfully exploited it providing with residence status without professional registration for Health Care Professionals. There is also yet another avenue

to obtain migration status without the professional qualifications but only with applicant's work experience or "on the job" training, as required by particular countries.

However, CDC does not accommodate all and sundry applications but concentrates only on selected fields and genuine applicants who would meet up to the required points accumulation along with their standards in the use of the English Language.

As for its staff, needless to say, CDC is equipped with a selected, dedicated, skilled and committed staff, namely Mr Samantha Liyanage, Mr Damian Hamer and Mrs Malini Ranawake handling the operational areas and the English Language training division (for IELTS/TOEFEL etc) handled by Mr Royce Weerasinghe and Mrs S. Jayasuriya, under the able leadership of their versatile Directress, Mrs Samanthika Pathirage, CDC will be a force to reckon with, in the field of migration, in Sri Lanka., in the years to come.
